A GUIDE TO VETAFARM PELLETS

We make our foods using only Australia's best and freshest ingredients.

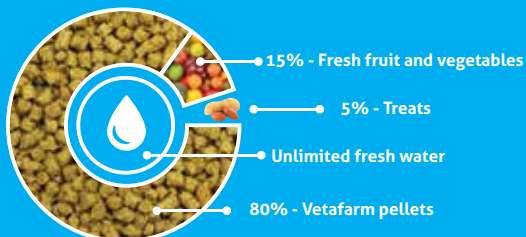

VETAFARM PELLETS

When a Vetafarm food is used as the majority (80%) of the feed, no other supplementation is required for your bird. All the necessary protein, carbohydrates, vitamins and minerals are incorporated into the pellet. Feeding Vetafarm pellets is a great option to ensure that your bird/s are having their nutritional requirements met.

Vetafarm's avian veterinarians and nutritionists have formulated a number of species-specific diets for those birds who have a more detailed nutritional requirement. Whether you've got a budgie or a macaw, we have a diet to suit.

FOR COMPLETE NUTRITION IN YOUR BIRDS, VETAFARM PELLETS SHOULD MAKE UP APPROXIMATELY 80% OF THE BIRD'S DIET.

FEEDING

All Vetafarm pellets should be fed in a clean, dry dish placed where it cannot be contaminated by droppings, water or cage substrate. If the feed does become contaminated, always replace with a fresh serving.

HOW MUCH DO I NEED TO PROVIDE FOR MY BIRD?

As a guide, most cage and aviary birds will consume about 10% of their body weight in pellets per day. As an example, a 100g cockatiel will consume approximately 10g of pellets per day.

FRUITS AND VEGETABLES

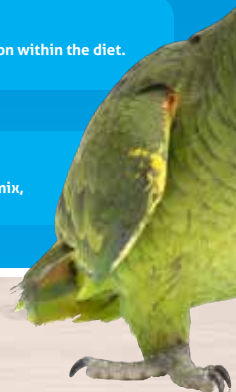

Fruits and vegetables should also be made available to encourage interaction, and provide variety and stimulation within the diet. Ensure that you are only feeding 20% of fruit and vegetables, as recommended in the chart above.

USING VETAFARM PELLETS AS A SUPPLEMENT

Vetafarm pellets can also be used as a supplement to seed-based or home made mixtures. When using within a mix, make sure that the Vetafarm pellet component is being consumed.

WANT TO CONVERT TO PELLETS?

On the next page you will learn some simple techniques to convert your bird from a seed-based diet to nutritious, delicious Vetafarm pellets.

HOW TO CONVERT YOUR BIRD TO PELLETS

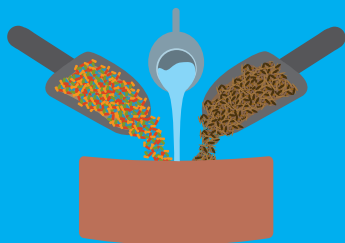

WET MIX BLEND

1. Mix Vetafarm pellets with seed at a ratio of 50:50 in the bird's regular feed dish.

2. Add enough hot water to make the mix sticky, and push down into the bottom of the bowl. Your bird will pick through the damp mix to eat the seed, but will get a taste for the pellets at the same time.

3. Reduce the seed content over a period of 5 days, until it is just pellets remaining.

Important: Mix must be replaced daily because of the water content.

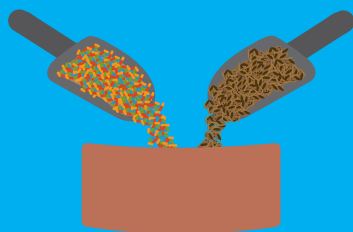

OR

DRY MIX BLEND

1. Mix Vetafarm pellets with seed at a ratio of 50:50 in the bird's regular feed dish.

2. Feed, without adding any water in to the mix. This way can be less effective and slower than conversion by wet mix as the birds can easily pick out the dry seeds without getting a taste for the pellets.

HOT TIPS:

If you have hand-raised birds that have been weaned onto Vetafarm pellets, their chicks will wean directly to pellets, in many cases, faster than they would take to seed.

All Nutriblend pellets are equal nutritionally, but have different flavours. This is why your bird might eat all the pellets of one colour before the others.

Persistence is key! Some birds convert quickly, whilst fussy eaters may take a much longer time. Be consistent, be patient and your feathered friend will be eating pellets in no time.

PACK SIZES

2kg
10kg

BREEDER PELLETS

Total nutrition for breeding parrots. Extruded pellet diet specifically designed to meet the dietary needs of breeding birds and their young.

TARGET SPECIES: Breeding Australian and Asiatic parrots. Also suitable for exotic breeding parrots (e.g. South American parrots).

RECOMMENDED USE: For use during the breeding season for optimum health of parents and chicks. Breeding birds require extra nutrition to enable them to lay fertile eggs and rear healthy chicks. Breeder Pellets contain extra protein, vitamins and minerals to support reproduction.

KEY FEATURES: Breeder Pellets contain extra protein, vitamins and minerals to support reproduction and meet the high nutritional demands of breeding. Formulated by avian veterinarians and extrusion cooked for optimum digestibility. Chicks raised by parents being fed Breeder Pellets can wean directly onto Maintenance Pellets.

DIRECTIONS: Breeder Pellets should be fed as a total diet, beginning approximately 6 weeks before breeding season and continued until chicks fledge. Although Breeder Pellets contain all the nutrition necessary for breeding, it is recommended that the birds be given access to fruit, vegetables, and native vegetation as environmental enrichment.

INGREDIENTS: Whole Australian grains (maize, soy bean and wheat), amino acids (lysine and methionine), vegetable oils and natural organic acids, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K), and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

PRODUCT EXPIRY: 2 years from date of manufacture.

GUARANTEED ANALYSIS:

Min. Crude Protein 20.0%
Max. Fibre 3.5%

Min. Crude Fat 5.0%
Max. Salt (NaCl) 0.5%

SUPERIOR EGG & BISCUIT FORMULA

Superior Egg & Biscuit Formula is a completely balanced diet.

TARGET SPECIES: Suitable for all birds including budgerigars, canaries and parrots.

RECOMMENDED USE: Completely balanced extruded pellet diet specifically designed to meet the particular dietary needs of budgerigars, canaries and parrots. Superior Egg & Biscuit Formula can also be used as dietary supplement food.

KEY FEATURES: Designed to be completely user friendly, our new formula can be fed as a complete food or as a supplement and at any time of the year, WET or DRY. Contains real Australian egg, and is cooked using extrusion technology for superior digestibility and safety. Formulated by vets, it contains balanced vitamins, minerals and calcium for both maintenance and breeding/chick rearing, and is flavoured with blueberry for superior acceptance by all species of bird.

DIRECTIONS: To use as a complete diet, make freely available as the primary food source. Vetafarm complete diets are designed to provide complete nutrition when fed at a rate of 80% or more of the total diet, with the remaining 20% consisting of fresh foods and treats. Fresh water must be available at all times.

DRY MIX: Simply add to your bird's food bowl straight from the pack.

WET MIX: Mix with water to provide the desired consistency – replace with fresh food every 24 hours.

INGREDIENTS: Whole grains (maize, soy bean, wheat), whole egg, soy protein, lecithin, vegetable oils and natural organic acids, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, D₃, E, and H) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

PRODUCT EXPIRY: 2 years from date of manufacture.

FINCH & BUDGIE CRUMBLES

Completely balanced extruded crumble diet.

TARGET SPECIES: Finches, canaries and budgerigars.

KEY FEATURES: Balanced formula – specifically designed to meet the particular dietary needs of pet and breeding finches and budgerigars. Fortified with vitamins, minerals and calcium for egg formation, strong development of young and general ongoing health. New and improved formula with blueberry extract.

DIRECTIONS: Make freely available as the primary food source. Vetafarm pellets are designed to provide complete nutrition when fed at a rate of 80% or more of the total diet. Fresh water must be available at all times.

INGREDIENTS: Whole grains (wheat maize, soy bean), amino acids (lysine and methionine), salt, vegetable oils and natural organic acids, blueberry flavour, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

INSECTA-PRO

Complete live food replacement.

TARGET SPECIES: Insectivorous and omnivorous birds (such as blackbirds, thrush and magpies). Not suitable for toucans and Indian mynas.

RECOMMENDED USE: Insectivorous birds require a diet high in protein and fat. Insecta-Pro has been designed to provide a supplemental feed for all insectivorous birds, including those requiring live food.

KEY FEATURES: Extrusion cooked for safety and digestibility. Takes the mess and guesswork out of feeding insect-eating birds. Supplies crucial proteins found in insects, which grains and vegetables lack. Stimulates breeding pairs of insectivores/ omnivores and balances the diet of young.

DIRECTIONS: Make freely available as the primary food source. Can be fed dry, mixed with water to create a crumble, mixed with other foods and fruits or dampened and rolled into balls. Insecta-Pro can be mixed with other soft feedstuffs such as fruits, pupae, eggs etc. This damp mix is supplied to the birds to provide a wide-based, nutritious feed that will stimulate breeding pairs and provide a fully balanced diet for the young.

INGREDIENTS: Lamb meal, whole grains (wheat and corn), soy protein, vegetable oils and natural organic acids, amino acids (lysine, methionine and threonine), vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

MACAW NUTS

Completely balanced extruded pellet diet for South American parrots.

TARGET SPECIES: Macaw Nuts are recommended for larger South American parrots, such as macaws.

RECOMMENDED USE: Macaw Nuts can be used as a complete diet for any pet or breeding South American bird, but they are also suitable for Australian and Asiatic parrots.

KEY FEATURES: Includes specific amino acids and proteins required by South American parrots. Completely balanced extrusion cooked diet. Contains fresh nuts to appeal to exotic parrots and replicate their natural diet. Contains all necessary nutrition required for general year-round maintenance and increased fatty acids, protein, vitamins and calcium to support egg production, young bird growth and general breeding.

DIRECTIONS: Macaw Nuts are a complete diet; no additional dietary supplementation is necessary. Fruits and vegetables can be given as behavioural enrichment.

INGREDIENTS: Whole grains (wheat, corn and soy bean), peanuts, vegetable oils, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, D₃, E and H) and minerals (calcium, cobalt, copper, iron, iodine, manganese, and zinc).

MAINTENANCE DIET PELLETS

Vet formulated complete diet for parrots.

TARGET SPECIES: Australian and Asiatic parrots.

RECOMMENDED USE: Maintenance Diet is veterinary formulated to fulfil all of your bird's core nutritional requirements. Use as a balanced diet to maintain birds at a healthy weight without excess fat deposition.

KEY FEATURES: Complete pet parrot nutrition in an easy to feed formula. No artificial colours, no artificial flavours and no added sugars. Made in Australia with only fresh, whole Australian produce direct from our farmers.

DIRECTIONS: Maintenance Diet provides your bird with the balance it needs for optimum feather development and tissue and brain function when fed as your bird's primary diet (80% of daily feed consumed). The remaining portion (20%) of the diet should be made up of healthy fruit and vegetables (15%) and a small amount (5%) of treat foods such as nuts, seeds or Vetafarm's Deli-Stix. Fresh water should be available at all times.

INGREDIENTS: Whole grains (wheat, corn and soy bean), vegetable oils, natural organic acids, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K, choline) and minerals (calcium, cobalt, copper, iron, iodine, manganese, & zinc).

NECTAR PELLETS

Low-sugar complete diet for lories and lorikeets.

TARGET SPECIES: Australian and exotic lories/lorikeets, especially suited to pet birds in mess-sensitive areas, but is also used in aviary birds to reduce mess and waste.

RECOMMENDED USE: Nectar Pellets are a complete diet. This formulation will help keep lories/lorikeets in a healthy weight range and support breeding birds to ensure optimum nutrition for young.

KEY FEATURES: Significantly reduces mess, waste and cost of feeding lories/lorikeets by effectively stopping them from squirting messy droppings. Low-sugar diet containing scientifically balanced nutrition replicating the diet lories/lorikeets eat naturally. Supplies all essential vitamins, minerals, amino acids and calcium for a long, healthy life. Apple flavoured for an attractive taste.

DIRECTIONS: Make freely available as the primary food source. Vetafarm complete diets are designed to provide complete nutrition when fed at a rate of 80% or more of the total diet. Fresh water must be available at all times. Blossom Nectar, fruits and vegetables can be given for variety and behavioural enrichment.

INGREDIENTS: Whole grains (maize, wheat and soy bean), psyllium husk, vegetable oils, natural organic acids, sugar, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K), minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc), apple flavour.

NUTRIBLEND PELLETS

Completely balanced, multi-coloured extruded pellet diet.

TARGET SPECIES: Australian and Asiatic parrots.

Available in 3 sizes – Mini (for small to medium parrots), small (for medium to large parrots) and large (for large and extra large parrots).

RECOMMENDED USE: Complete diet for parrots, Nutriblend Pellets are veterinary formulated to fill all your birds' core nutritional requirements.

KEY FEATURES: Fruit flavoured, multi-coloured pellets promote better acceptance by seed-eating birds. Includes balanced vitamins, minerals, calcium and amino acids essential for a stable maintenance diet during the regular season. Extrusion cooked pellets offer a palatable, balanced diet that maintains birds at a healthy weight. Eliminates waste associated with seed and ensures a longer, healthier life by providing scientifically formulated nutrition.

DIRECTIONS: Nutriblend Pellets provide your bird with the balance it needs for optimum feather development and tissue and brain function when fed as your bird's primary diet (80% of daily feed consumed). The remaining 20% of the diet should be made up of healthy fruit and vegetables (15%) and a small amount of treat foods such as nuts, seeds or Vetafarm Deli-Stix (5%).

INGREDIENTS: Whole grains (soy bean, wheat and maize), vitamins (A, B₆, B₁₂, C, D₃ and E), minerals (calcium, copper, iron, magnesium, phosphorus, selenium, sodium and zinc), fruity flavours (apple, blueberry and raspberry), amino acids (lysine and methionine), vegetable oils, and natural organic acids.

PARROT ESSENTIALS

Complete diet for parrots.

TARGET SPECIES: All parrots, particularly pet birds.

RECOMMENDED USE: A veterinary formulated complete diet for optimum nutritional balance. The inclusion of 5% real fruit and 5% fresh nuts mixed through the pellets provides variety and is a great source of enrichment when compared to plain pellet diets.

KEY FEATURES: Variety, balance and absolutely irresistible flavours all in one – without the use of added colours! Parrot Essentials supplies the balance needed for optimum health, while also offering variety into the daily diet with the inclusion of quality first-grade fruit harvested from the Mildura river lands and a pinch of almond pieces from north-west Victoria.

DIRECTIONS: Parrot Essentials is a complete diet; no additional dietary supplementation is necessary. If using Parrot Essentials for exotic breeding pairs, additional calcium source such as D Nutrical is a welcome addition. Fruits and vegetables should be given as behavioural enrichment (approx 20% of the total diet).

INGREDIENTS: Whole grains (maize, soy bean, wheat and oats), vegetable oils and natural organic acids, almond chips, and dehydrated fruit, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

PRODUCT EXPIRY: 2 years from date of manufacture.

GUARANTEED ANALYSIS:

PARADISE PELLETS

Complete diet for frugivores.

TARGET SPECIES: Eclectus parrots and other frugivores such as birds of paradise, toucans and mynas. Also suitable for: Australian, Asiatic and exotic parrots.

RECOMMENDED USE: Completely balanced extruded pellet diet specifically designed to meet the particular dietary needs of pet and breeding eclectus parrots and other frugivores.

KEY FEATURES: Low iron formula, containing increased levels of vitamin A and vitamin C that fruit eaters require, along with balanced minerals, calcium and amino acids for egg formation, strong development of young and general ongoing health. Super-palatable fruit flavour (apple) is readily accepted by all birds. Reduces the mess, waste and cost of feeding fruit eaters.

DIRECTIONS: Paradise Pellets are a complete diet - no additional dietary supplementation is necessary. Fruits and vegetables can be given as behavioural enrichment, but to balance nutrition, Paradise Pellets should be fed as a minimum of 50% of the diet.

INGREDIENTS: Whole grains (wheat, corn and soy bean), fructose, vegetable oils, amino acids, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, D₃, E, and H), minerals (calcium, cobalt, copper, iron, iodine, manganese, and zinc).

FOREST FUSION LORIKEET

Great tasting, completely balanced extruded diet.

TARGET SPECIES: Australian and exotic lorries/lorikeets.

RECOMMENDED USE: Forest Fusion Lorikeet is designed as a complete diet when fed at 80% of the total diet. Fresh foods such as fruit may be given as behavioural enrichment.

KEY FEATURES: Formulated by veterinarians and made with fresh Australian ingredients, specifically designed for lorikeets. Vetafarm's Forest Fusion Lorikeet has been developed with no artificial colours, no refined sugars and no by-products. Made with real, delicious dates, bee pollen and blueberry extract, achieving a natural sweetness and amazing taste.

DIRECTIONS: Make freely available as your bird's primary diet. Forest Fusion Lorikeet may be fed dry, directly out of the packet, or as a wet mix by adding a small amount of water. **WET MIX:** A wet mix can be achieved by adding an amount of warm water to the powder and mixing thoroughly with a fork. You can mix to any consistency you desire. Vetafarm recommends a mix of 1 heaped teaspoon of Forest Fusion Lorikeet with 10 teaspoons (50mL) of warm water. Mix well with a fork and change every 24hrs.

INGREDIENTS: Whole Australian grains (corn and rice), blueberry, pitted dates, eucalyptus bee pollen, soy isolate, sucralose, vegetable oil, natural organic acids, vitamins (A, B₁, B₃, B₅, B₆, B₁₂, C, D₃, E, H and K) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

SOUTH AMERICAN MIX

Complete Diet for conures, amazons and macaws.

TARGET SPECIES: South American Mix is recommended for South American parrots such as conures, amazons and macaws. South American Mix can be used for any pet or breeding South American bird.

RECOMMENDED USE: South American Mix has been developed to provide complete nutritional balance for growth, breeding, brain function and optimum feather development when fed at 80% of the total diet.

KEY FEATURES: South American Mix has been designed to meet the nutritional needs of South American parrots for both breeding and companion birds. The pellets have been cooked through an extrusion process, which allows for quicker absorption and a higher uptake of nutrients into the bird. South American Mix is made from human-grade ingredients grown in Australia with added fresh nuts for stronger palatability.

DIRECTIONS: Feed pellets at a rate of approx 8g per 100g of bodyweight – consisting of 80% of the diet. The remaining 20% should consist of a combination of fresh fruits and vegetables (15%) and fresh, hand-selected nuts (5%) such as almonds, walnuts and macadamias. Vetafarm Deli-Stix can also be added to this 5% as a healthy, balanced treat and behavioural enrichment tool. (E.g. A small conure (approx. 100g bodyweight) requires a minimum of 8g of South American Mix per day. A medium amazon (approx. 400g bodyweight) requires a minimum of 30g of South American Mix per day. A large macaw (approx 800g bodyweight) requires a minimum of 60g of South American Mix per day).

INGREDIENTS: Whole Australian grains and nuts (wheat, corn, soy bean, peanuts and almonds), potato starch, chicory root extract, vegetable oils and natural organic acids, amino acids (lysine, methionine and threonine), choline, vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, E, H and K) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

10kg

NEOCARE

Super premium hand-rearing formula.

TARGET SPECIES: Specifically designed for parrots as a complete hand-rearing formula – but suitable for all birds.

RECOMMENDED USE: Suitable for use from hatching through to weaning.

KEY FEATURES: Veterinary formulated to ensure precise nutrition in baby birds. Contains all necessary vitamins, minerals, calcium and amino acids for growing bones, organ function and strong feather development. Also contains Vetafarm Synbiotic – providing both probiotics to promote healthy gut flora and pre-digestives to increase gut efficiency and ensure maximum absorption of nutrients. Extrusion cooked for safety and increased digestibility.

DIRECTIONS: MIXING REGULAR FORMULA: Add one large, level scoop of formula to a jar or cup, then add one large scoop of boiling water. Mix thoroughly using a fork for 30 seconds until a thick and consistent paste is formed. Add a further 3 small scoops of cool water and mix for a further 2 minutes or until an even consistency is achieved. Check temperature and feed.

The temperature of food fed to babies (irrespective of age) should be between 36–38°C.

FEEDING FREQUENCY AND AMOUNT: The age and species of birds being raised affects the amount and frequency of feeds. Be sure to research the requirements of your individual birds thoroughly before you begin. As a rule, the last feed of the day should be late at night, around 10–11pm, and the next feed early the following morning at approximately 5–6am. It is important to note that at the first feed of the day the crop should be completely empty. The crop should be allowed to empty completely once every 24 hours.

Fresh batches of Neocare must be mixed each feed. DO NOT store or refrigerate any pre-mixed formula for later use.

INGREDIENTS: Whole grains (corn, wheat and soy bean), vegetable oils and natural organic acids, amino acids (lysine and methionine), vitamins (A, B₁, B₂, B₃, B₆, B₉, B₁₂, C, D₃, E, H and K), minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

PRODUCT EXPIRY: 2 years from date of manufacture.

GUARANTEED ANALYSIS:

Min. Crude Protein 21.0%

Max. Fibre 4.0%

Max. Salt (NaCl) 0.5%

Min. Crude Fat 15.0%

DELI-STIX — BEST OF BOTH WORLDS

A healthy functional treat for parrots.

TARGET SPECIES: Suitable for all parrots.

RECOMMENDED USE: Designed to provide your bird with natural variety and foraging experience.

KEY FEATURES: Quality and variety are two of the most important ingredients in a healthy diet and, more importantly, a healthy lifestyle for your pet parrot. Vetafarm Deli-Stix provide for these crucial needs by supplying a variety of high-quality natural ingredients and a sprinkling of veterinary formulated pellets.

DIRECTIONS: Deli-Stix should be included as part of a balanced diet and should be used as a treat or reward, used in conjunction with a recommended Vetafarm complete diet.

INGREDIENTS: Vetafarm's nutritionally balanced pellets (Nutriblend small), with Australian grown almonds, peanuts and select seasonal fruits.

PRODUCT EXPIRY: 2 years from date of manufacture.

PACK SIZES

100g
(Pack of 9)

DELI-STIX — SMALL PARROT PERFECTION

A healthy functional treat for small parrots.

TARGET SPECIES: Small Parrot Perfection is designed specifically to satisfy our much-loved smaller birds, but can be used for the bigger birds too!

RECOMMENDED USE: Designed to provide your bird with natural variety and foraging experience.

KEY FEATURES: Quality and variety are two of the most important ingredients in a healthy diet and, more importantly, a healthy lifestyle for your pet parrot. Vetafarm Deli-Stix provide for these crucial needs by supplying a variety of high-quality natural ingredients and a sprinkling of veterinary formulated pellets.

DIRECTIONS: Deli-Stix should be included as part of a balanced diet and should be used as a treat or reward, used in conjunction with a recommended Vetafarm complete diet.

INGREDIENTS: Vetafarm's nutritionally balanced pellets, mixed fruit, peanut chips, millet, canary seed and sunflower seeds.

PRODUCT EXPIRY: 2 years from date of manufacture.

250mL

CALCIVET

Liquid calcium and vitamin D3 supplement.

TARGET SPECIES: Birds on seed diets, particularly during the breeding season.

RECOMMENDED USE: Calcivet has been formulated to supplement the diet of caged birds where calcium and vitamin D3 may be low. Regular use in all seed-eating birds will ensure adequate calcium for strong bones, muscle formation and general well being. Can also be used as an emergency oral calcium supplement for egg bound or critically deficient birds.

KEY FEATURES: Supports breeding birds and their young with essential calcium. Contains vitamin D3 to maximise calcium absorption in the gut. Supports shell formation and the normal development of bones in young birds.

DIRECTIONS: Calcivet may be added to water, soft foods or given as a direct dose in times of emergency.

WATER: Add 5mL per 250mL of drinking water (1 tsp per cup). Use as the sole source of water and prepare fresh solution daily.

SEED: Pour 5mL over 1 cup soaked seed.

DIRECT DOSE: 0.2mL (4 drops) per 100g body weight. Safe to use in conjunction with other medications.

ACTIVE INGREDIENTS: PER LITRE: Calcium 33g, vitamin D3 25,000 IU.

PRODUCT EXPIRY: 3 years from date of manufacture.

PACK SIZES

100mL

1L

BREEDING AID

An oil-based breeding supplement for birds, and fortified with vitamins to assist in egg production and hatchability.

TARGET SPECIES: Breeding birds on seed diets leading into and during times of egg production.

RECOMMENDED USE: Use Breeding Aid during breeding season to enhance breeding success and egg membrane formation, assisting in egg production and hatchability. Particularly useful for smaller birds that produce large numbers of eggs or multiple clutches. Additional vitamin, mineral and calcium supplements are still advised for birds on seed diets.

KEY FEATURES: Unique formulation of fatty acids and vitamins. Used as an overnight soak on seeds, oils naturally penetrate through the seed hull into the kernel through osmosis. Assists in the normal development of egg membranes and assists birds in producing the maximum amount of fertile eggs.

DIRECTIONS: Mix 20mL of Breeding Aid per 1kg (1 ½ fl oz. per 5lb) of seed thoroughly by hand and allow the mixture to sit for 12 to 24 hours to maximise seed absorption. Batches of seed can be made up to last a week, with treated seed not used in the first day being stored in the refrigerator.

ACTIVE INGREDIENTS: PER LITRE: Vitamin A 200,000 IU, vitamin D₃ 20,000 IU, vitamin E 80 IU, linoleic acid 430 g, palmitic acid 52 g, oleic Acid 11 g.

PRODUCT EXPIRY: 3 years from date of manufacture.

MULTIVET WITH MOULTING AID

Essential vitamins, minerals and amino acids.

TARGET SPECIES: Birds.

RECOMMENDED USE: Multivet will supplement the diet with essential vitamins, minerals and nutrients to assist in the maintenance of general health and feather development, and may assist in the prevention of disease associated with vitamin deficiency.

KEY FEATURES: Multivet provides a balance of nutrients essential for the general health of birds, particularly those fed on seed diets. The amino acids in Multivet are essential for the normal and healthy development of feathers. Vitamins and proteinated minerals are included to ensure absorption in the gut.

DIRECTIONS: Shake well before use. Mix 0.5mL of Multivet with 150mL of clean drinking water and supply for 3–5 days each week and daily during the moult. Multivet is best used daily in young birds up to their first moult, then every second day afterwards as an ongoing dietary supplement.

ACTIVE INGREDIENTS: Vitamins (A, B₁, B₂, B₃, B₅, B₆, D₃ and E), minerals (copper (as copper proteinate), manganese (as manganese proteinate) and zinc (as zinc proteinate) and amino acids (choline, lysine and methionine)).

PRODUCT EXPIRY: 3 years from date of manufacture.

PACK SIZES

D NUTRICAL POWDER

Triple calcium, vitamin and mineral supplement.

TARGET SPECIES: All birds on seed diets, particularly during the breeding season.

RECOMMENDED USE: Use D Nutrical to fortify any food source (e.g. homemade hand-rearing formulas) with calcium, vitamins and minerals. Ideal as a maintenance supplement or for use during breeding (particularly useful for calcium supplementation in breeding birds and growing chicks).

KEY FEATURES: Supports birds on seed diets that lack key nutrients. Triple calcium sources promote high-quality eggshell production, strong bone formation in young birds and general good health. Easily dusted onto food sources. Used and recommended by Birds International (Philippines).

DIRECTIONS: Use twice weekly for maintenance and daily during breeding.

INTRODUCING D NUTRICAL: Start with a dose of 5g per kg of feed and gradually increase to 20g over 6 feeds.

MAINTENANCE DOSE: Add 20g of D Nutrical per kg (1 oz per 3 lb) of food to boost active calcium levels. Fresh fruit and vegetables can be dusted with D Nutrical and added to bird diets.

ACTIVE INGREDIENTS: PER GRAM: 310mg calcium (31%). Also contains: vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂, C, D₃, and E) and minerals (phosphorus, sodium, iodine, potassium, iron, cobalt, copper, magnesium and manganese).

PRODUCT EXPIRY: 3 years from date of manufacture.

500g

POLY-AID PLUS

First-aid supplement for sick and injured birds and animals.

TARGET SPECIES: Sick and injured birds and animals.

RECOMMENDED USE: Poly-Aid Plus is a welcome addition to a bird keeper's first-aid kit. Use as a first-aid supplement for sick, injured or stressed birds and small animals that are not eating voluntarily. Poly-Aid Plus does not cure disease – it simply gives birds some energy to fight for themselves.

KEY FEATURES: Sustained-release carbohydrates, proteins, probiotics and electrolytes. Contains sustained release carbohydrates for ongoing energy, probiotics to restore gut flora, essential proteins, vitamins and electrolytes to assist in recovery from illness and stress.

DIRECTIONS: Add 5mL of water to 10g of Poly-Aid Plus and make into a slurry. Can be administered directly via medication needle or added to food sources for animals eating voluntarily but requiring additional dietary support to make a stronger recovery.

Make up fresh for each use, and discard any unused portion.

ACTIVE INGREDIENTS: PER 10G DOSE: Vitamins: A (200 IU), B₁ (94µg), B₂ (240µg), B₃ (1mg), B₅ (248µg), B₆ (80 µg), B₉ (45µg), B₁₂ (1µg), C (10mg), D₃ (25 IU), E (0.5mg), H₁ (2µg) & K (0.2mg), hydrolysed starch-maize (7.5g), albumen (2g), calcium gluconate (58mg), choline bitartrate (8mg), magnesium sulphate (45mg), potassium chloride (76.8mg), Probiotic (0.1g), sodium chloride (110.2mg).

PRODUCT EXPIRY: 3 years from date of manufacture.

80g

SOLUVITE D BREEDER

Twelve essential vitamins and minerals and boosted vitamin D₃.

TARGET SPECIES: All birds housed indoors.

RECOMMENDED USE: Designed for bird breeding farms, zoos and indoor aviaries. Limited exposure to sunlight may result in vitamin D deficiency. Vitamin D has a role in the absorption of calcium. Calcium is essential for normal growth of healthy bones in young birds and for normal eggshell formation in breeding hens.

KEY FEATURES: Super concentrated vitamin supplement (10 times stronger than standard Soluvite D) - very cost effective. Contains all 12 essential vitamins required for a balanced diet in birds along with increased levels of vitamin D₃ to support birds with insufficient access to natural sunlight.

Vitamin D₃ is a particularly important nutrient. Birds housed indoors may lack D₃, which can lead to poor breeding success and chick growth, inadequate calcium absorption and many other problems.

DIRECTIONS: Add 5g (1 heaped enclosed spoon) to 5L of water and stir well OR add 5g to 8kg of food and combine well. (US conversion: add 1 heaped enclosed spoon to 5qt or add 5g to 17½lb of food). Daily use of vitamins in either food or water is recommended to supplement the diet. Soluvite D Breeder may be used in all species of birds. Prepared water should not be exposed to direct sunlight; use as the sole source of water and prepare fresh solution daily.

ACTIVE INGREDIENTS: PER KG: Vitamin A 10,000,000 IU, thiamine (B₁) 4,700 mg, folic acid (B₉) 2,250 mg, vitamin D₃ 2,500 000 IU, pyridoxine (B₆) 4,000 mg, riboflavin (B₂) 12,000 mg, vitamin E 25,000 IU, vitamin B¹² 50 mg, choline bitartrate 400 mg, vitamin K 20,000 mg, iodine 2,000 mg, biotin (H) 100 mg, vitamin B₃ 12,420 mg, niacin (B₃) 50,000 mg.

PRODUCT EXPIRY: 3 years from date of manufacture.

PACK SIZES

1kg

SOLUVITE D

Twelve essential vitamins and boosted vitamin D₃.

TARGET SPECIES: Caged and aviary birds housed indoors.

RECOMMENDED USE: Caged birds on seed diets require nutritional supplementation with vitamins and minerals to maintain good health. Limited exposure to sunlight may result in Vitamin D deficiency. Vitamin D has a role in the absorption of calcium, which is essential for the normal health and growth of bones in young birds and eggshell formation in breeding hens. Use Soluvite D to assist in the prevention of diseases associated with vitamin deficiency.

KEY FEATURES: An easy-to-administer concentrate for bird keepers.

DIRECTIONS: Daily use of vitamins in either food or water is recommended to supplement the diet.

FOR BEST RESULTS IN WATER: Add 4g to 40mL of warm water (30–40°C), stir well to dissolve. Then add the mixed 40mL solution to 360mL of drinking water. Prepared water should not be exposed to direct sunlight. Use as the sole source of water and prepare fresh solution daily. (USA conversion: add 1 scoop to 3tbs of warm water (86°F-104°F) and mix to dissolve, then add 1½ cups of drinking water and mix well).

FOR BEST RESULTS IN FOOD: Sprinkle 4g of Soluvite D onto 4 cups of food and combine well.

Daily use of vitamins in either food or water is recommended to supplement the diet.

ACTIVE INGREDIENTS: PER KG: Vitamin A 1,000,000 IU, vitamin D₃ 250,000 IU, vitamin E 2,500 IU, vitamin K 2,000mg, niacin 5,000mg, pantothenic acid 1,242mg, riboflavin 1,200mg, thiamine 470mg, pyridoxine 400mg, cyanocobalamin (B12) 5mg, folic acid 225mg, choline bitartrate 40mg, biotin 10mg, iodine 200mg.

PRODUCT EXPIRY: 3 years from date of manufacture.

AVICARE

General purpose cleaner and disinfectant. Gentle on birds, tough on germs.

TARGET SPECIES: Housing and equipment for birds.

RECOMMENDED USE: Use as a safe and effective disinfectant cleanser for all situations that require a high level of hygiene, such as brooders, incubators, hospital cages and for disinfection of equipment.

KEY FEATURES: Hospital B grade disinfectant, kills bacteria, viruses and fungi on contact. Is effective in up to 20% organic matter – perfect for disinfection in dirty situations. Gentle on birds, tough on germs. Completely safe for all birds, environments and equipment.

DIRECTIONS:

READY TO USE:

CLEANING: Spray Avicare RTU directly onto items and scrub/clean as required, rinse and allow to dry.

DISINFECTION: Spray with Avicare RTU, allow 5 minutes for disinfection to occur, allow to dry (if required) and then use items as normal.

CONCENTRATE: Dilute Avicare Concentrate with water 1:50 prior to use. (For example 20mL/L or 4 US tsp. per qt).

CLEANING: Spray prepared Avicare solution directly onto items and scrub/clean as required, rinse and allow to dry.

DISINFECTION: Spray with Avicare solution, allow 5 minutes for disinfection to occur, allow to dry (if required) and then use items as normal.

ACTIVE INGREDIENTS: 50g/L Benzalkonium chloride, 25g/L Sulphamic acid.

PRODUCT EXPIRY: 3 years from date of manufacture.

PACK SIZES

100mL

AVICLENS

Water cleanser for drinking water.

TARGET SPECIES: Aviclens is safe to use in drinking water of all pets, every day.

RECOMMENDED USE: Use Aviclens to protect your pet's drinking water from build up of green slime and waterborne organisms. Can also be used to stop fermentation in soaked seed. Aviclens is safe to use with any in-water supplement, but is not suitable for mixing with parasite controls, antibiotics or probiotics.

KEY FEATURES: Keeps water clean, fresh and safe. Aids in crop and digestive health by reducing waterborne organisms in drinking water. Protects drinking water from green slime formation, reducing cleaning time of water containers. Does not negatively affect gut flora.

DIRECTIONS: SHAKE WELL BEFORE USE. Add 1mL of Aviclens to 2L of fresh water. (US conversion: Add 10 drops of Aviclens per qt. of drinking water).

Use prepared mix as animal's normal drinking water or as a seed-soaking solution.

Change drinking water after 1–2 days in warm weather and 3–4 days in cooler temperatures.

Soak seeds for up to 24 hours.

ACTIVE INGREDIENTS: Chlorhexidine gluconate 10mg/mL.

PRODUCT EXPIRY: 3 years from date of manufacture.

PACK SIZES

350g

LIZARD FOOD

Extrusion cooked, complete diet for lizards.

TARGET SPECIES: Skinks, including blue tongues, shingle backs and Cunninghams.

RECOMMENDED USE: Provides a high-quality, nutritionally balanced diet for lizards.

KEY FEATURES: Highly palatable, made with fresh Australian ingredients, contains mutton bird oil, balanced calcium/phosphorus ratio. Made from natural ingredients, does not contain any artificial colours or flavours.

DIRECTIONS: Make available at all times as the primary source of food. Fresh fruit and vegetables may also be given to add dietary variety. Change daily if product becomes wet.

INGREDIENTS: Lamb, fish meal, Tasmanian muttonbird oil, whole grains (wheat and soy bean), vitamins (A, B₁, B₂, B₃, B₆, B₁₂, C, D₃, E, and K), minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc), amino acids (lysine and methionine).

PRODUCT EXPIRY: 2 years from date of manufacture.

150g

MULTICAL DUST

Powdered calcium, vitamin and mineral supplement for addition to food items.

TARGET SPECIES: All reptiles in need of calcium, vitamin and mineral support.

RECOMMENDED USE: To supplement the diet of any reptile, with essential nutrients, calcium, vitamins and minerals. May be used in all species of reptile and incorporated with any food type.

KEY FEATURES: Super-fine powder that sticks to feeder insects and stays on, ensuring reptiles receive the nutrition they need. Simple and effective supplementation.

DIRECTIONS:

LIVE FOOD: Place insects in a bag and add one scoop of Multical Dust – shake gently until insects are liberally coated, then feed to reptiles immediately.

FRUIT/VEGETABLES: Add to food items at the rate of 1 level scoop per 150–200g (5–7oz) of food.

ACTIVE INGREDIENTS: Vitamins (A, B₁, B₂, B₃, B₆, B₁₂, D₃, E, H and K), minerals (calcium ions, chloride, iron, iodine, magnesium, phosphorus, potassium ions and zinc) and amino acids (arginine, choline, histidine, isoleucine, leucine, lysine, methionine, phenylalanine, threonine, tryptophan and valine).

PRODUCT EXPIRY: 3 years from date of manufacture.

RABBIT ORIGINS

Completely balanced diet.

TARGET SPECIES: Rabbits (adult, young, pregnant or nursing).

RECOMMENDED USE: Use as a completely balanced diet for pet rabbits when fed at a ratio of 75% high-fibre hay, 20% pellets and 5% treats and fresh foods.

KEY FEATURES: Australian made with fresh, wholesome ingredients, grown with love and hand selected from Australian farms. No by-products. All natural health support – contains natural chicory root, encouraging beneficial gut flora and immune function. Uniquely extruded – ensures optimum digestibility, safety and palatability.

DIRECTIONS: Vetafarm Rabbit Origins is designed to be fed in different quantities depending on the age and activity levels of your rabbit. Generally your rabbit's diet should consist of 20% Rabbit Origins, 75% high-fibre Hay and 5% treats (selected) and greens. Young, pregnant/nursing rabbits, or those animals requiring a higher specification diet for health reasons, should be allowed free access to Rabbit Origins, while mature rabbits should be fed as per the guide below.

CAVY (GUINEA PIG) ORIGINS

Nutrient fortified diet for cavies.

TARGET SPECIES: Pet guinea pigs.

RECOMMENDED USE: Use as a completely balanced diet for pet guinea pigs when fed at a ratio of 75% high-fibre hay, 20% pellets and 5% treats and fresh foods.

KEY FEATURES: Contains stabilised vitamin C, and is Australian made with fresh, wholesome ingredients; grown with love and hand selected from Australian farms. No by-products. All natural health support – contains natural chicory root, encouraging beneficial gut flora and immune function. Uniquely extruded – ensures optimum digestibility, safety and palatability.

DIRECTIONS: Vetafarm Cavy Origins is designed to be fed in different quantities depending on the age and activity levels of your guinea pig.

YOUNG, PREGNANT NURSING GUINEA PIGS: Unlimited access.

ADULT (PER DAY): 1/8 cup for small cavy and 1/4 cup for large cavy.

Please note that the above feeding recommendations are to be fed in addition to unlimited access to high-fibre grass hay and should be used as a guide only. Be sure to check with your veterinarian or contact Vetafarm for more specific information if required, particularly if your guinea pig has special dietary needs.

INGREDIENTS: Fescue grass hay, lucerne, oat fibre, wheat, soy bean, oats, chicory root (inulin), vitamins (A, B₁, B₂, B₃, B₅, B₆, B₉, B₁₂), stabilised vitamin C, D₃, E, H and K) and minerals (calcium, cobalt, copper, iodine, iron, magnesium, manganese, phosphorus, potassium, selenium, sodium, sulphur and zinc).

DELI-STIX — HERBIVORE HARVEST

A healthy functional treat for small animals.

TARGET SPECIES: This treat is perfect for rabbits, guinea pigs, and even omnivores such as rodents.

RECOMMENDED USE: Designed to provide your pet with natural variety and foraging experience.

KEY FEATURES: High in vitamin C to combat scurvy in guinea pigs, and is chock full of fibre and naturally healthy vegetables. Quality and variety are two of the most important ingredients in a healthy diet and, more importantly, a healthy lifestyle for your small herbivore. Vetafarm Herbivore Deli-Stix provide for these crucial needs by supplying a variety of high-quality natural ingredients and a sprinkling of veterinary formulated pellets.

DIRECTIONS: Deli-Stix should be included as part of a balanced diet and should be used as a treat or reward, used in conjunction with a recommended Vetafarm complete diet, such as Cavy Origins or Rabbit Origins.

INGREDIENTS: Vitamin C enriched, veterinary formulated pellets, high-fibre fescue, carrots, pumpkin and tomato pieces.

PRODUCT EXPIRY: 2 years from date of manufacture.

PREDAMAX

Powdered supplement for carnivores fed on raw meat diets.

TARGET SPECIES: Dogs, cats and ferrets.

RECOMMENDED USE: Use for carnivores being fed a raw meat diet to supplement the diet with crucial vitamins and minerals that may be lacking, and to prevent deficiencies, ensuring optimum nutritional balance.

KEY FEATURES: Essential vitamins, minerals and dual source of calcium for animals fed on raw diets. Supports daily wellbeing, including support for bones, coat, brain and immune function. Designed by veterinarians, trusted by leading zoos and breeders. Flavoured with real kangaroo for excellent palatability.

DIRECTIONS: Dust food with 1 gram (approx 1 level enclosed spoon) of Predamax per 4kg (8.8lb) body weight of animal. 1 dose of Predamax per day is recommended. Consult your veterinarian before modifying the recommended dose. This dose rate supplies approximately 50% of the NRC canine requirement for maintenance. Growing animals should receive approximately double this recommendation.

ACTIVE INGREDIENTS: PER KG: Calcium (235.7g), phosphate (105g), vitamin A (690,000 IU), vitamin D₃ (70,000 IU), vitamin E (145 mg), vitamin K (227mg), vitamin B₁ (320mg), vitamin B₂ (610mg), vitamin B₆ (200mg), vitamin B₁₂ (0.7 mg), pantothenate (680mg), niacin (2100mg), folic acid (10mg), choline bitartrate (15mg), salt (37g), iodine (53.2mg), iron (1320mg), cobalt (13.8mg), magnesium (1280mg), manganese (186mg) and zinc (221mg).

PRODUCT EXPIRY: 3 years from date of manufacture.

SYNBIOTIC 180-S

Nine-strain probiotic blend (180 million CFU/g) with natural prebiotic (chicory root extract) and enzymes.

TARGET SPECIES: All animal species, including domestic pets, livestock, small animals and reptiles.

RECOMMENDED USE: Use in all animals in times of stress, illness, injury, post antibiotic treatment or as a daily supplement to support the immune and digestive systems.

KEY FEATURES: 180 million CFU/g concentration of good bacteria ensures optimum immune system and digestive support. Nine unique strains of beneficial bacteria ensures health benefits to any animal. Seven digestive enzymes directly improve digestion. Natural prebiotic chicory root extract feeds and nourishes Bifidobacterium, boosting immune strength. Enzymes directly improve digestion of foods, which is crucial for animals recovering from stress and injury.

DIRECTIONS: WATER: Add 3g (1 enclosed scoop) of Synbiotic 180-S to 1L of clean drinking water OR

FOOD: Add 6g (2 enclosed scoop) of Synbiotic 180-S to 1kg of dry food, soft food, vegetables, meat, rearing formula, milk replacers, etc. (25g jar scoop measures 1g, all other sizes measure 3g).

Double this dose during times of stress, illness, injury or post antibiotic therapy.

ACTIVE INGREDIENTS: Probiotics: (180 million CFU/g) *Lactobacillus acidophilus*, *L. casei*, *L. salivarius*, *L. plantarum*, *L. rhamnosus*, *L. brevis*, *Bifidobacterium bifidum*, *B. lactis*, *S. thermophilus*.

Prebiotic: Inulin (chicory root extract)

Enzymes: Protease, amylase, cellulase, hemicellulase, lipase, papain, bromelain.

PRODUCT EXPIRY: 3 years from date of manufacture.

PACK SIZES

125mL

SPARK LIQUID

Sustained-release energy supplement and electrolytes.

TARGET SPECIES: Suitable for all animals.

RECOMMENDED FOR: Use in your pet's drinking water to rehydrate, replenish and assist in recovery during times of extreme temperatures, stress, illness or injury.

KEY FEATURES: Veterinary formulated to ensure optimum results for rehydration, replenishment and in recovery from stress and temperature extremes. Easy to administer – simply add to your pet's drinking water. Fast and effective electrolyte and energy replenishment – starts restoring the balance as soon as it is consumed.

DIRECTIONS: Add 20mL per 1L of drinking water. Use as the sole source of water and prepare fresh solution daily.

ACTIVE INGREDIENTS: PER LITRE: Glucose 135g, citrate ions 30.31g, sodium ions 13g, potassium ions 20g.

PRODUCT EXPIRY: 3 years from date of manufacture.
