MAINTENANCE DIET

Maintenance Diet is Vetafarm's original veterinary formulated diet for all parrots with no artificial colours, flavours or added sugars. Proudly Australian made with local produce and over 30 years of avian nutritional expertise – Maintenance Diet is both delicious and good for your bird.

Provides a balanced diet that fulfils your bird's core nutritional requirements and supports growth, optimum feather development, as well as tissue and brain function.

NUTRIBLEND

Companion birds require a nutritionally balanced diet for growth, optimum feather development, tissue and brain function.

Containing balanced vitamins, minerals, calcium, and essential amino acids, Nutriblend Pellets have been formulated to fill all your bird's core nutritional requirements. Fruit flavoured and multicoloured, Nutriblend comes in 3 sizes: Mini, Small and Large to suit all parrots.

PARROT ESSENTIALS

Parrot Essentials was formulated by veterinarians for optimum nutritional balance. The inclusion of real fruit and fresh nuts mixed through with pellets provides variety and is a great source of enrichment when compared to plain pellet diets.

Parrot Essentials supplies the balance needed for optimum health (feather development, tissue and brain function), while also offering variety into the daily diet with the inclusion of hand-selected fresh fruit and nuts from Australian farms.

SOUTH AMERICAN MIX

South American birds, such as conures, quakers, macaws and amazons, have their own specific nutritional needs. South American Mix has been formulated to provide high quality nutrition that specifically suits the dietary requirements of South American birds. With fresh Australian grown almonds, balanced amino acids, vitamins and minerals for optimum growth, breeding, brain function and optimum feather development.

MACAW NUTS

Larger parrots require excellent nutrition to ensure they live a long and healthy life. Macaw Nuts have been specifically designed to provide the necessary vitamins, minerals, proteins and essential fatty acids for year round maintenance and support throughout breeding. Containing fresh nuts, Vetafarm Macaw Nuts appeals to exotic parrots and encourages foraging. A larger pellet than South American Mix can be more attractive for larger parrots.

PARADISE PELLETS

Electus Parrots are frugivorous (fruit eating) tropical parrots. Their natural diet consists mainly of fresh native fruits and their kernels. Paradise Pellets have been formulated to replicate the natural diet of these birds with fresh Australian grown fruit, low iron levels and a high level of vitamin A, to ensure a nutritionally balanced and complete diet.

AVIAN

FINCH & BUDGIE CRUMBLES

Finch & Budgie Crumbles have been designed to provide complete nutritional balance for growth, breeding, brain function and optimum feather development. Finch & Budgie Crumbles are made with care using hand-selected Australian produce. There are no artificial colours or by-products, ensuring that your feathery friend is receiving the highest quality food.

INSECTA-PRO

Insectivorous birds like magpies, kookaburras and finches primarily feed on insects and require a diet high in fat and protein. Insecta-Pro is a unique powdered diet specifically designed as a complete live food replacement for all insectivorous birds, including those typically considered omnivorous.

NECTAR PELLETS

Inspired by the natural diet of lorikeets/lories, Nectar Pellets provide a completely balanced diet in an easy to feed extruded pellet. The added psyllium husk improves digestive health and also improves the consistency of lorikeet droppings, reducing mess and waste for indoor companions.

FOREST FUSION

Distributed widely throughout Australia, lorikeets and lorries feed mainly on fruit, pollen and nectar, and possess a tongue adapted especially for their particular diet. Made with real, delicious dates, bee pollen and blueberry extract, Forest Fusion has been specifically designed to replicate the natural diet of loris/lorikeets without the high sugar content of traditional diets.

WILD EARTH

Lorikeets are the lovable lunatics of the bird world. Vetafarm have formulated a specific diet for lorikeets, replicating their pollen, fruit and nectar diets of the wild. Made fresh, using only the highest quality ingredients, Wild Earth is packed with the natural goodness of bee pollen, fresh fruits, a range of low GI carbohydrates as well as balanced vitamins, minerals and organic acids.

BLOSSOM NECTAR

Nectar is a large part of the diet for nectivorous species like lorikeets, honey eaters or sugar gliders, however nectar is not nutritionally balanced with vitamins, minerals and amino acids. Blossom Nectar is a nutritious food source for these species with added amino acids, vitamins and minerals for nutritional balance, in a stabilised liquid formula.

PARROT BREEDER PELLETS

Parrot Breeder Pellets are designed to support successful breeding of parrots by fulfilling the increased nutritional demands of breeding season. Helping to protect your hen from egg binding and supports membrane development, shell formation, and chick development.

NUTRIBLEND BREEDER

Leading up to and during breeding season, birds require extra nutrition to maximise breeding success. Fulfilling nutritional needs during breeding season protects your hen from egg binding and supports membrane development, shell formation, and chick development.

Nutriblend Breeder contains extra protein and amino acids, plus all of the vitamins and minerals needed to support reproduction and meet the high nutritional demands of egg production and chick raising.

NEOCARE

Neocare is the culmination of 40 years of veterinary and nutritionist experience, resulting in unmatched baby bird growth and development. The formula contains fresh non GMO ingredients, balanced vitamin mineral and amino acid profiles along with probiotics and enzymes to kick start the infant digestive and immune systems. With excellent mixing properties, rapidly digestible nutrition and veterinary backing, there is simply no better way to start the life of baby bird than with Neocare.

DELI STIX FORAGE & FEAST

Providing a balanced diet and enrichment for your birds is vital to their health and wellbeing. Expertly formulated by veterinarians, Deli Stix Forage & Feast combine seasonal fruits and nuts with Vetafarm's Nutriblend pellets to form a hanging treat bar that will keep your birds happy and healthy! Forage & Feast is perfect for larger parrot species but can be enjoyed by all parrots!

BREEDING AID

Breeding Aid provides essential fatty acids and vitamins A, D and E to aid in the development of healthy egg membranes, embryo growth, and assist birds in producing the maximum number of fertile eggs. Breeding Aid is an essential supplement for all breeding birds.

CALCIVET

Calcium is a vital nutrient needed for all stages of breeding and the development of young chicks. Calcivet provides birds with a highly digestible form of liquid calcium and vitamin D3, needed for shell formation, laying and bone development. This supplement is essential in any serious breeders feeding regime.

MULTIVET

Domestic pet birds that are fed on predominantly seed diets may have nutritional deficiencies related to their diet. These deficiencies can progress into other nutrition related diseases. Multivet is an easy to administer, in-water formula that provides essential vitamins, minerals and amino acids. Multivet is an ideal supplement for all birds, especially those on seed based diets.

SOLUVITE D

Soluvite D is an easy to administer, water soluble formula that provides additional Vitamin D3, as well as other essential vitamins. Using Soluvite D can assist in the prevention of deficiencies making it an ideal supplement for birds housed indoors, without access to natural sunlight.

SOLUVITE D BREEDER

Soluvite D Breeder is an easy to administer, water soluble formula that provides additional Vitamin D3, as well as other essential vitamins. Soluvite D Breeder is 10 times stronger than Soluvite D, suitable for breeders, large aviaries, zoos, wildlife rescues and veterinarians.

D NUTRICAL

D Nutrical is a powdered supplement designed to fortify any food source with calcium, vitamins and minerals. Containing triple calcium sources, D Nutrical promotes high quality eggshell production, strong bone formation and general good health.

PROBOTIC

The health of the microbiome in our bird's gut is absolutely essential for a healthy life. The bacteria in the microbiome helps digest food, regulate the immune system and protect against other bacteria that cause disease. Probiotic contains 7 unique strains of beneficial bacteria, everyday use helps to maintain a balanced digestive system and improves intestinal balance.

SPARK LIQUID

A shot of electrolytes can be a life saver if your pet is sick or has heat stress. Spark Liquid provides hydration and quick recovery with its specifically designed electrolyte formula. Spark Liquid is the perfect support in times of hot temperatures, illness, stress and transport.

POLY AID PLUS

Poly Aid Plus is a welcome addition to a bird keeper's first aid kit. Use as a first aid supplement for sick, injured or stressed birds and small animals that are not eating voluntarily. Poly Aid Plus does not cure disease - it simply gives birds some energy to fight for themselves.

AVIMEC

Avimec is a safe and effective drop on scaly face mite treatment, protecting budgerigars from mite infestation.

AVICARE

Cleanliness and hygiene are incredibly important to the overall health of birds. Without a clean environment birds may fail to thrive. Avicare has been developed to be a safe and effective way to clean cages, toys, perches and other equipment by removing any bacteria, fungi and viruses that may be thriving.

AVICLENS

Your bird's drinking bowls make the perfect breeding ground for micro-organisms such as bacteria, fungi and viruses. Aviclens protects drinking water from water-borne organisms and green slime formation, helping to keep water bowls fresh and safe for your bird.

SMALL ANIMAL

RABBIT ORIGINS

Rabbit Origins is one of Vetafarm's best selling products and for good reason. Rabbit Origins contain locally sourced fresh ingredients such as fescue hay grown on Vetafarm's own farm, specially balanced vitamins and minerals and chicory root to encourage healthy gut balance. The calcium to phosphorus ratio in Rabbit Origins has been carefully balanced to promote optimum growth and development and to assist in the prevention of long-term diseases, such as metabolic bone disease.

CAVY ORIGINS

Guinea pigs require a high fibre diet for the development of strong bones and to wear down their ever growing teeth. Just like humans, guinea pigs need vitamin C supplemented in their diet for maintaining healthy cartilage, tendons and bones. Cavy Origins is made with hand selected Australian ingredients and includes stabilised vitamin C, to provide guinea pigs with a high quality, nutritionally balanced diet.

RODENT ORIGINS

Rodents are miraculously adaptable, social, omnivorous survivors. While rodents are the ultimate survivors. Their omnivorous diet means they can generally survive on almost anything - they do far better and make much better pets when on a balanced diet. Rodent Origins is a completely balanced diet with vitamins, minerals and natural chicory root. Made from fresh, Australian non-GMO ingredients.

DELI STIX HERBIVORE HARVEST

Providing a balanced diet and enrichment for your small animals is vital to their health and wellbeing. Expertly formulated by veterinarians, Deli Stix Herbivore Harvest combine seasonal vegetables with vitamin C enriched pellets to form a hanging treat bar that will keep your small animals happy and healthy! Herbivore Harvest is perfect for rabbits, guinea pigs and other herbivores!

VITASOL DROPS

Vitamin deficiencies can cause serious health problems in small animals. Vitasol Drops are a highly concentrated source of essential vitamins that have been veterinary formulated to balance the diets of small animals.

VITA C TABLETS

Guinea pigs cannot produce their own vitamin C, so they must have it supplemented in their diet. Vitamin C is essential for collagen production and immune system maintenance. Without it, they are at risk for diseases such as scurvy. Vita C Tablets provide vitamin C, plus other essential vitamins to keep your guinea pigs in optimum health.

HUTCH CLEAN

Cleanliness and hygiene is incredibly important to the overall health of animals. Without a clean enclosure animals may fail to thrive. Hutch Clean has been developed to be a safe and effective way to clean hutches and remove any bacteria, fungi and viruses on contact.

DUSTING & BATHING POWDER

Traditional baths may cause unnecessary stress for small animals. Dusting & Bathing Powder is designed to stimulate natural grooming behaviour in small animals to help clean the skin and coat and fight bad odours.

DOG & CAT

B-CALM

Functional chews formulated by veterinarians to nutritionally support the management of low-level stress and anxiety with natural ingredients. Made with the amino acid L-tryptophan – a natural precursor for the synthesis of serotonin in the brain and flavoured with Australian ovine plasma and kangaroo. No artificial binders, colours or flavours. Grain free.

DENTASHIELD

A combination of concentrated Norwegian brown kelp, high in naturally occurring polyphenols to combat biofilm, with SHMP to aid in the reduction of tartar formation and improve general oral health. Flavoured with natural ovine plasma and Australian kangaroo, with no artificial colours, flavours or binders.

PREDAMAX

An invigorating combination of essential vitamins, minerals and a dual source of calcium to enhance and balance your dog's diet. Flavoured with natural Australian ovine plasma and kangaroo. Predamax is grain free with no artificial colours, flavours or binders.

B-CALM CAT

Functional chews formulated by veterinarians to nutritionally support the management of low-level stress and anxiety with natural ingredients. Made with the amino acid L-tryptophan – a natural precursor for the synthesis of serotonin in the brain – and flavoured with Australian ovine plasma and mackerel. No artificial binders, colours or flavours. Grain free.

DENTASHIELD CAT

A combination of concentrated Norwegian brown kelp, high in naturally occurring polyphenols to combat biofilm, with SHMP to aid in the reduction of tartar formation and improve general oral health. Flavoured with natural Australian ovine plasma and tasty mackerel, with no artificial colours, flavours or binders.

DOG & CAT

PREDAMAX

Carnivores require a wide range of vitamins and minerals to maintain their healthy skin and fur. Without a nutritious diet, they become prone to hair loss, skin disease, and infection. Predamax was designed to support daily wellbeing, bones, coat, brain and immune function. Flavoured with real Kangaroo for excellent palatability, Predamax is a powdered calcium, vitamin and mineral supplement with essential nutrients for carnivores fed on raw, or low-quality diets.

SPARK LIQUID

A shot of electrolytes can be a life saver if your pet is sick or has heat stress. Spark Liquid provides hydration and quick recovery with its specifically designed electrolyte formula. Spark Liquid is the perfect support in times of hot temperatures, illness, stress and transport.

REPTILE

LIZARD FOOD

Vetafarm have developed a high-quality food for lizards, made from locally sourced fresh ingredients, vitamins, minerals and other essential nutrients to ensure optimum nutrition for all stages of life.

Ectotherm Lizard Food is ideal for blue tongues, shinglebacks, monitors, skinks and dragons.

INSECT FOOD

When insects are fed a high-quality diet, their own nutritional value significantly increases, meaning they become a much more beneficial food source for lizards, snakes, turtles, and frogs.

Insect Food provides high levels of protein, along with the vitamins and minerals necessary for optimum nutrition.

This unique food is the only extruded food made for insects, ensuring that it is the most palatable and easily digested food available.

MULTICAL DUST

When insects, fresh fruit and vegetables make up the majority of a reptiles' diet, it can be difficult to ensure that they are receiving a balanced diet. Multical Dust is a micronized powder that has been formulated by veterinarians to supplement the diets of reptiles and amphibians, providing a dual-source of calcium, vitamins, minerals, and amino acids necessary for optimum nutrition.

VITAMIN DROPS

Vitamin deficiencies are common in lizards and snakes, causing serious health problems. Ectotherm Vitamin Drops have been designed by veterinarians to provide the essential vitamins required by reptiles.

BOOSTER

When reptiles are sick, stressed, or injured they may lose their appetite and require extra nutrition to prevent further decline in health. Booster has been formulated by veterinarians to help deliver the energy, vitamins, and essential amino acids necessary for recovery.

SHEDDING MIST

Shedding Mist has been designed to aid snakes and lizards during the natural process of shedding. With a unique blend of organic polymers, Shedding Mist hydrates and softens old skin easing the shedding process, while conditioning the new skin to leave it with a healthy shine.

ENCLOSURE CLEAN

Cleanliness and hygiene are incredibly important to the overall health of animals. Without a clean enclosure animals may fail to thrive. Enclosure Clean has been developed to be a safe and effective way to clean enclosures and remove any bacteria, fungi and viruses that may be thriving instead of your scaly friend.

ZOO, AQUARIUM & CRITICAL CARE

PREDAMAX

Carnivores require a wide range of vitamins and minerals to maintain their healthy skin and fur. Without a nutritious diet, they become prone to hair loss, skin disease, and infection. Predamax was designed to support daily wellbeing, bones, coat, brain and immune function. Flavoured with real kangaroo for excellent palatability, Predamax is a powered calcium, vitamin and mineral supplement with essential nutrients for carnivores fed on raw, or low-quality diets.

PENGUIN TABLETS

The feeding of frozen fish is associated with vitamin deficiencies. To prevent nutrition related disease in captive penguins, supplementation is often required. Penguin Tablets were formulated by veterinarians with essential vitamins and minerals to balance the diet of these penguins. These tablets are easily administered by adding them to the gills of feeder fish.

PENGUIN TABLETS + CANTHAXANTHIN

The feeding of frozen fish is associated with vitamin deficiencies. To prevent nutrition related disease in captive penguins, supplementation is often required. Penguin Tablets were formulated by veterinarians with essential vitamins and minerals to balance the diet of these penguins. They contain canthaxanthin to enhance red and orange colouration. These tablets are easily administered by adding them to the gills of feeder fish.

SEA BIRD TABLETS

The feeding of frozen fish is associated with vitamin deficiencies. To prevent nutrition related disease in captive sea birds, supplementation is often required. Sea Bird Tablets were formulated by avian veterinarians with essential vitamins and minerals to balance the diet of these captive birds. These tablets are easily administered by adding them to the gills of feeder fish.

ELASMO TABS

To prevent nutrition related disease in domestic elasmobranchs, supplementation is often required. Elasma Tabs were formulated by veterinarians with essential vitamins and minerals to balance the diet of these captive elasmobranchs. These tablets are easily administered by adding them to the gills of feeder fish.

AQUATIC MAMMAL CHEWS

Marine mammals, particularly those fed on frozen fish diets, are susceptible to nutritional deficiencies. Aquatic Mammal Chews provide crucial vitamins where levels may be low.

ZOO, AQUARIUM & CRITICAL CARE

FLAMINGO MAINTENANCE PELLETS

Flamingo Maintenance Diet is a vet and nutritionist formulated diet for flamingos. A balanced diet to support growth, optimum feather development, tissue and brain function, with canthaxanthin for vibrant plumage. These unique pellets float allowing them to be scattered directly onto the water.

FLAMINGO BREEDER PELLETS

During breeding season and in the lead up to breeding, flamingos require extra nutrition to maintain good health, colouring and maximise breeding success. Flamingo Breeder Pellets contain all nutrients needed to meet the high nutritional demands of breeding flamingos.

CRITTACARE AVIAN

Sick, stressed and injured birds require exceptional nutritional care to help with recovery. Crittacre Avian provides high quality vitamins, minerals and essential amino acids, with prebiotics and probiotics to aid in re-establishing healthy gut function and support struggling digestive systems.

Crittacre Avian is used and trusted by veterinarians, zoos and wildlife parks across the world.
